PROFILE SUMMARY

Second-year Computer Science Engineering student with strong foundations in C++ programming, core CS subjects (Operating Systems, Computer Networks, DBMS), and hands-on experience in frontend web development. Actively preparing for Data Structures & Algorithms in C++ and learning MERN stack to pursue a career in software engineering.

TECHNICAL SKILLS

Languages: C,C++, JavaScript, Java (Basic), Python (Basic)
Web Technologies: HTML5, CSS3, React.js
Core CS: Data Structures & Algorithms, OS, DBMS, Computer Networks
Tools: Git, GitHub, Linux (Basic), Domain & Hosting

PROJECTS

- Quick Pull – Real-Time Ride-Sharing System | Ongoing (Team of 4 | Lead Contributor)** - Developing a real-time, peer-to-peer ride-sharing platform that dynamically matches users on overlapping routes without advance booking. Engineered a live GPS matching algorithm to suggest optimal, low detour pickup and drop-off points. Implemented a dynamic fare engine to automatically recalculate and equitably distribute shared costs based on real-time distance, travel duration, and route overlap.
- PerfectXSkills- Sports Tournament Platform (Team of 4 | Lead Contributor)** – Built a sports tournament platform where users can organize and join tournaments, with a player rating system given by organizers or teammates that helps teams prioritize high- rated players in future tournaments.

EDUCATION

Bachelor's of Computer
Sciences Engineering
CGPA: 9.63 / 10
Chitkara University, Baddi
Himachal Pradesh

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
